

Prevent Auto Dispensers

Timed Automatic Dispensers are ideal for use in many unoccupied spaces such as roof voids, stores or domestic rooms where flying insects are a problem. Allowing flexible spray treatment, timed aerosol dispensers deliver a customised solution for a range of applications. Easy to programme, the LED & LCD options allows insecticide aerosols to be dispensed on selected days of the week, between selected time periods at prescribed intervals, matching the situation needs exactly and maximising the life of aerosol.

Prevent Auto

Prevent Auto has been developed for use in an electrically operated automatic aerosol dispenser that pre-measures the dose that is released. The canister contains pyrethrins, natural insecticidal substances purified from chrysanthemum flowers. These flowers have been available in Europe for over 150 years and in their powdered form were used as louse and flea powders. It is only in the last 50 years that liquid concentrates for public health pest control have appeared.

Correctly sited, the Prevent Auto aerosol can keep areas free from insects such as flies, wasps, moths, silverfish and other bristle tails and booklice. It is approved for use in food factories, food storage areas and catering establishments. Prevent Auto can also be used in public buildings, hotels, offices, warehouses, schools, hospitals (but not occupied ward areas). In animal husbandry the use covers kennels, stables, catteries, barns and veterinary premises.

Each can contains 250ml which can deliver 3000 metred doses when used with a 100µl metred valve. Product can be dispensed at set intervals giving each can an inuse life of 50 hours to 125 days.

Each can will treat an area up to 170 cubic metres.

Pyrethrins cause rapid knockdown of insects followed shortly by death. The mode of action is by contact action, the toxic effect is caused by the binding of pyrethrins to sodium channels which inhibits the insect's nervous system. This mode of action leads to a broad-spectrum of insecticidal activity, and due to the non-persistence of the active ingredient in the environment, insect resistance is very rare.

For use only as an insecticide. This product is approved under The Control of Pesticides Regulations 1986 for use as directed. If there is evidence of Bats then insecticides MUST not be used. Prevent Auto is not a normal aerosol – you cannot hold the button down for continuous release of the product.

Active Ingredients:

Pyrethrins 1% (HSE 8504)

Prevent Auto Dispensers

The LCD dispenser is easy to programme and allows aerosols to be dispensed on selected days of the week, and at selected time periods, matching the needs of a location exactly and maximising the life of spray.

- Strong chemical resistant polypropylene plastic casing
- Easy aerosol replacement
- Hidden on/off switch
- Low battery indicator: red LED, empty can indicator: green LED
- Factory set for metred 24 hours, 15 minute, 7 day release
- Complete flexibility of start/stop time and of spray time between 1 and 60 minutes. E.g. Dispensers can be set to activate at intervals from 9 am to 5 pm and then programmed to switch off after these hours on a Monday-Friday only.
- Days remaining can-life indication
- Built in 24 hour clock
- 'Day off' programming capability
- Hidden external instant test switch
- Lockable dispenser with generic key

Requires: 2 x C size alkaline batteries

LCD Aerosol Dispenser

An innovative addition to the aerosol dispenser range, providing increasingly flexible spray delivery and efficient usage via the use of light sensors. This allows the dispenser to be set for darker hours times when insects such as moths are most active.

- Discreet, white finish
- Easy aerosol replacement
- Hidden on/off switch
- Low battery indicator - Red LED
- Empty can indicator - Green LED
- Quick switch selection of 7.5, 15 or 30 minute settings
- Day, night or 24h setting
- Hidden external instant test switch
- Lockable dispenser with generic key

Requires 2 x C size alkaline batteries

LED Night & Day Aerosol Dispenser

Both the above dispensers have a 5 year guarantee. The dispensers supplied may vary.

Historyonics Social and Environmental Commitment

We are committed to ensuring our business delivers societal benefits in improving the internal and external environments in which we live and work. We equally encourage our clients to consider carefully which products are purchased, how they are used and ultimately disposed. Please order only what you need and that products and packaging materials are recycled or reused where possible. Contact us at info@historyonics.com should you require more information.
